

The “CPA” part sets us apart... make sure you know the facts

When hiring accountants, many people think they are getting CPAs when in fact they are not. In reality, many “accounting services” have little or no business or accounting training at all. The CPA designation is one of the most widely recognized and highly trusted professional designations in the business world. CPAs are distinguished from “accountants” by stringent qualifications and licensing requirements. So, to ensure your accounting services are being handled properly, verify the firm’s licensure at <http://www.mass.gov/dpl/boards.htm>.
